

Have you ever wondered what the new building next to the cluckhouse is?

Well – it will surprise most of you to find out that it is in fact a toilet BUT it is no ordinary toilet – it is a special type of eco-toilet that helps us to be kinder to our environment by reducing our waste. It is called a composting toilet which is used by HEN children.

This was made possible by a generous donation from the West Solent Co-operative who run the Solar Farm in Lymington. We are so lucky to have the West Solent Co-operative to help us in school. You may not be aware that they have helped us with previous projects too such as:

The new boiler

The water recycling in the school garden

The bottle greenhouse

And they advised us on the solar panels.

Mrs Ewing in HEN said that “the new toilet enables children to become more independent while we can still ensure that they are safe.”

Mrs Riley said – that the children love it. They think the idea of going upstairs and the fact that it is entirely wooden is really marvellous. She also said that it is great for the environment because the waste gets turned into compost and it saves water because you don't have to flush it.”

We are very lucky to have Anthony Woolhouse the director of the West Solent Co-operative here today to thank them for their help in making our school a better place.

We have a little something to say thank you.

PRESENTATION

We would like to finish now with some quotes for you to think about –

GO GREEN – THERE IS NO PLANET B

THE GREATEST THREAT TO OUR PLANET IS THINKING THAT SOMEONE ELSE WILL SAVE IT – It is everybody's job to look after our planet and thanks to our friends at the West Solent Co-operative we are doing just that.
